

Draft Stormwater Management Plan

Brownhill Keswick Creek

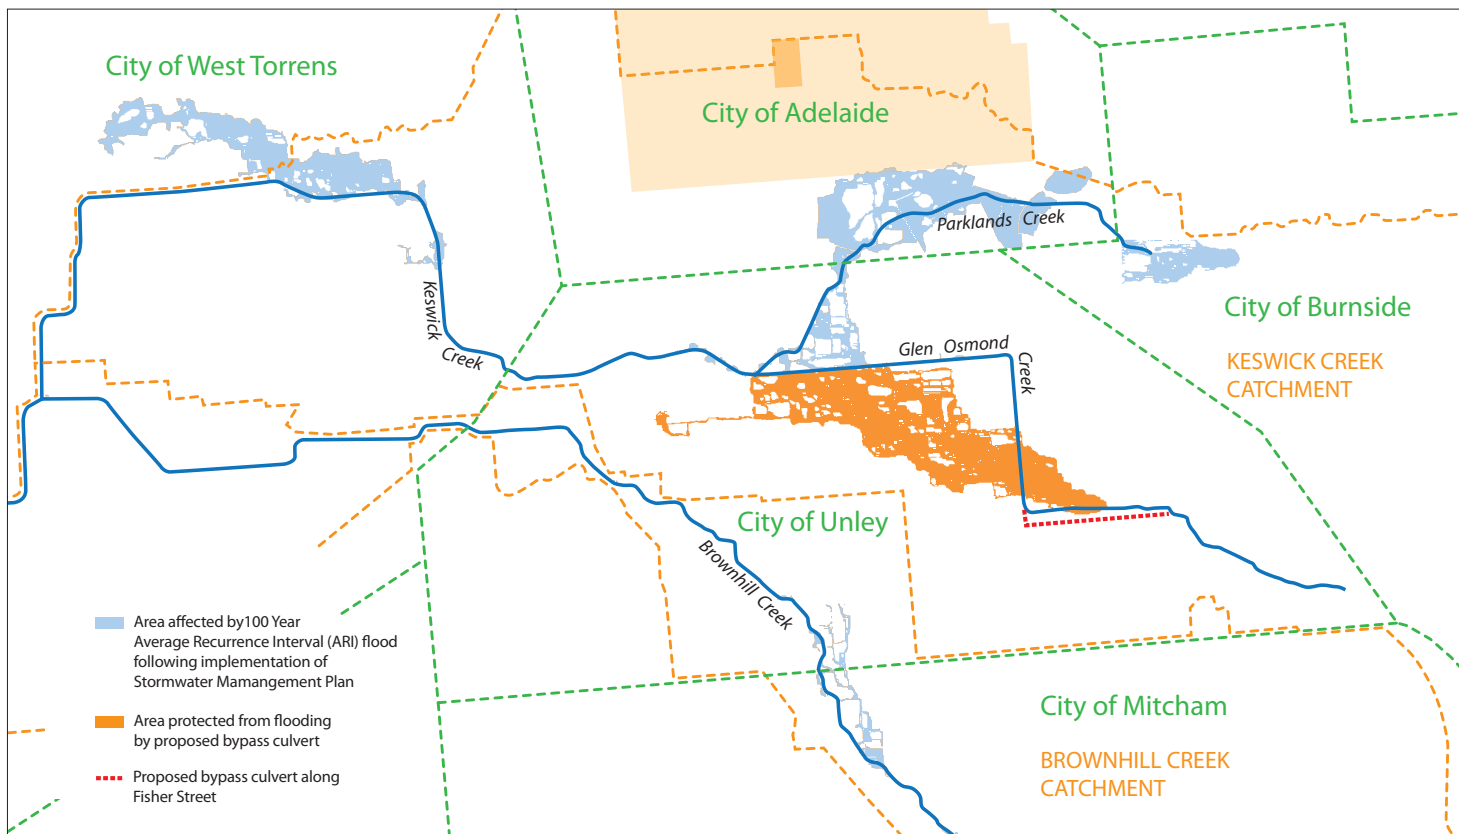

A Draft Stormwater Management Plan (the Draft Plan) has been developed to reduce the impact of major flooding across the catchment of the Brownhill, Keswick, Glen Osmond and Parklands Creeks that flow through the Cities of Adelaide, Burnside, Mitcham, Unley and West Torrens.

Flooding Risk North of Fisher Street, Fullarton

The Draft Plan includes maps showing the extent of flooding that would be experienced by properties in the catchment in a 100 Year ARI storm at present with no flood mitigation, and after the flood mitigation proposals in the Draft Plan are implemented. A 100 Year Average Recurrence Interval (ARI) flood is a flood that will occur on average once every 100 years, and has a 1% chance of occurring in any given year.

Figure 28 in the Draft Plan shows that with implementation of the recommended flood mitigation proposals, an area of Fullarton north of Fisher Street remains subject to flooding from Glen Osmond Creek.

However, the bypass culvert proposed by the Draft Plan along Fisher Street, Fullarton, between Wycliff Street and Windsor Street would in fact protect this area from flooding in a 100 Year ARI flood, and so the flood modelling and Figure 28 will be updated to remove the flooded area in the final version of the Stormwater Management Plan.

More Information

From Monday 31 October to Monday 12 December 2011 members of the public are invited to provide feedback on the Draft Plan. Feedback collected will be considered in finalising the Draft Plan.

More information including the complete Draft Stormwater Management Plan can be found online by following the link on the City of Unley website www.unley.sa.gov.au, and can be viewed in hard copy at the offices of the Cities of Adelaide, Burnside, Mitcham, Unley and West Torrens.
