January 31, 2018

REGIONAL SUBSIDIARY SET TO ASSUME PROJECT MANAGEMENT

The five catchment councils have approved a draft charter for the establishment of a new regional subsidiary, which will soon assume responsibility for the construction, management and ongoing maintenance of all flood mitigation works as part of the Brown Hill Keswick Creek Stormwater Project.

The proposed regional subsidiary will be known as the "Brown Hill Keswick Creek Stormwater Board" and act on behalf of the five catchment councils to manage the implementation of the approved Brown Hill Keswick Creek Stormwater Management Plan.

Details of the proposed regional subsidiary have been submitted to the Minister for Local Government, the Hon. Geoff Brock MP, for final approval.
