

Brown Hill Keswick Creek Stormwater Project Victoria Park /Pakapakanthi (Park 16) Wetland Update 3

February 2021

Update

Bardavcol has been appointed as the lead contractor to construct the wetland at the southern end of Victoria Park/ Pakapakanthi (Park 16) and construction work is commencing soon.

Initially, perimeter fencing will be erected around the construction area and pathway detours will be established. The main construction works will then follow including clearing the area, earthworks, and installation of drainage elements.

You may have noticed the establishment of a large, fenced area in late December 2020 (north of the proposed wetland site, opposite Swaine Avenue). This area will be used as a stockpile site to store and sort soil excavated to create the wetland. This area is temporary only and will be reinstated following construction.

Access

The construction of the wetland will require a large area, meaning that some paths and exercise equipment at the southern end of Park 16 will not be available during this time.

There is signage on site to guide you along safe alternate routes and detours.

Trucks

The construction team will mostly access the site from Fullarton Road (via the gates between Williams and Swift Avenues), with some access required from the Greenhill Road end of Beaumont Road.

We encourage you to keep your dog on leash if you are walking along the section of path next to Fullarton Road.

COVID-19 impacts

There may be delays to the project schedule depending on any ongoing COVID-19 restrictions to construction work. We will keep you updated on any impacts via the project website and through our email database.

Open Day

On Saturday 12 December 2020 we held an open day on site to provide the opportunity for people to learn more about the wetland and the construction process. Approximately 80 people attended the open day. Overall feedback was very positive with lots of support for the wetland.

Staying in touch

The project team has developed detailed information about the project which is contained in the project brochure, fact sheets and FAQs. These can be found at www.bhkcstormwater.com.au

Should you have any questions please contact our dedicated engagement team on 1300 281 235 or at info@southparklands.com.au
