

# Brown Hill Keswick Creek Stormwater Project Update

Dear resident,

The Brown Hill Keswick Creek Stormwater Project will soon commence construction of the Lower Brown Hill Creek Upgrades, which involves increasing the flow capacity of the 3.3-kilometre-long section of channel beginning at the south-eastern corner of the Adelaide Airport and ending at Anzac Highway.

Commencing in December 2022 and continuing throughout 2023 the following work packages will be undertaken:

- Reconstruction and widening of the Brown Hill Creek bridge across Watson Avenue.
- Reconstruction and widening of the 400-metre-long section of the existing concrete channel downstream of Watson Avenue, to the point where Brown Hill Creek meets Keswick Creek.

Refer to the concept plan below for the extent of works.

As part of these works, it has been identified that improvements to the safety and traffic flow at the Watson Avenue and Beare Avenue intersection can also be achieved through reconfiguration of the intersection and these works will involve:

- Reconstruction of the road pavement, kerbing and footpaths.
- Reconstruction of underground stormwater drainage.
- Removal of shrubbery and small trees within the creek line
- Relocation of existing gas and water services.
- Establishment of new fences and barriers.

Work zone traffic management will be in place throughout the construction period and access to private properties will be maintained at all times. Pedestrian and cycle access across Brown Hill Creek will also be maintained at all times.

The construction contract has been awarded to Camco (SA) Pty Ltd, a highly respected and experienced South Australian business. Camco will establish site amenities

and begin demolition of the existing bridge structure from 5 December 2022. This will ensure that the site is ready for construction of the new Watson Avenue crossing and upgraded channel to begin in earnest in January 2023, when flows in the channel are less frequent.

These works are being managed on behalf of the Brown Hill and Keswick Creeks Stormwater Board.
